

Automatic Bottle Vacuum

Semi-Automatic and Fully Automatic Models Available

Bottle Vacuums use dual action nozzles to first blast the inside of each container with air to loosen dust and debris. Nozzles then seal the bottle opening and vacuum out debris to an easily cleanable waste reservoir. Bottle vacuums are available in both Automatic and Semi-Automatic models and are ideal for containers that are difficult to invert or otherwise rinse clean of debris.

Standard Features:

- Heavy-Duty Stainless Steel Construction
- Automatic Container Indexing
- Allen Bradley Micrologix PLC with Touchscreen Interface
- Multiple Memory Location for Recipes
- Dual Action Rinse and Vacuum Nozzles
- Simple, Tool Free Adjustments and Easily Cleanable Waste Reservoir
- Variable Speed Power Conveyor
- Container Vision System
