

# Bottle Separators

## Single and Dual, Belt and Disc Separators

Bottle Separators use a belt or a wheel to put space between containers on a packaging line. Space between bottles may be required for certain packaging functions. For example, to ensure only a single label is applied to each bottle on a conveyor. Separators may also be used to move containers over deadplates connecting conveyors on an automated, turnkey packaging line.

### Standard Features:

- Variable Speed Motors and Controllers
- Conveyor Mounting Package or Portable Frame Assembly
- Easily Adjustable Width and Height
- Rubber Contact Surfaces
- Integration Friendly Design – Works with Existing Packaging Lines
- Easy Clean-Up and Maintenance

## LPS Product Line

### Turntables

- Loading
- Transfer
- Accumulating

### Conveyors

- Bottle Transfer
- Cooling
- Laning

### Container Cleaning

- Air Rinsers
- Wet Rinsers
- Bottle Vacuums

### Filling Machines

- Fill-To-Level
- Volumetric
- Net Weight

### Capping Machines

- Spindle & Chuck
- Corking
- ROPP

### Complimentary Equipment

- Nitrogen Purge
- Neck Banders
- Bottle Separators

**And Custom Packaging Machinery for Unique Projects!**

*Leading companies.  
Leading solutions.*
