

Bartop Corker

**Tabletop, Semi-Automatic
and Fully Automatic Models
Available**

Bartop Corkers use a corking head to press down corks, T-corks and similar closures as bottles pass through the capping area. Automatic corks use a cork delivery system to seal bottles as they pass on a power conveyor. Bottle corks are seen mostly in the distilled spirits, wine and olive oil industries but can be used for any product sealed with a cork-like closure.

Standard Features:

- **Stainless Steel C-Frame Construction**
- **Cork Sorting Device with Cork Chute for Quick Cork Delivery on Automatic Models**
- **Allen Bradley PLC with Touchscreen Operator Interface**
- **Simple Operation & Changeover on All Models**
- **Easy Height Adjustment on All Models for Large and Small Containers**
- **Built to Handle a Range of Containers and Closures**
