

Tabletop, Semi-Automatic and Fully Automatic Models Available

The ROPP Capping Machine is built to thread aluminum roll-on pilfer proof (ROPP) caps onto containers. Aluminum blanks are threaded using custom capping heads for the closure employed on any given packaging project. Common in the wine and distilled spirits industry, these cappers are gaining popularity in other industries that desire tamper evident sealing for their products.

Standard Features:

- Stainless Steel Construction
- Capping or Threading Heads Matched to Each Project
- Indexing System for Bottle Locating
- No Cap and No Bottle Vision Systems
- Allen Bradley PLC with Touchscreen Operator Interface
- Simple Height Adjustments
- 4-Roll Capping Head for ROPP Closures
- Cap Sorter and Chute for Cap Delivery
